Quantemol database QDB pricing

Membership	Product	Annually*	3 years*
Basic	Access to individual chemical reactions from public domain	FREE	FREE
Academic	Additional access to pre assembled most common chemistry	¥ 558,000	¥ 1,395,000
Industrial	Additional access to pre assembled most common chemistry	¥ 744,000	¥ 1,860,000
	Individual reaction calculation request	PPA	
	Individual chemistry design and validation request	PPA	

* - all the prices are inclusive Athenasys reseller commission

General terms

Commercial research - research by commercial organisation or for commercial organisation with results not disclosed to public access.

Non-commercial research - research by not-for-profit organisation producing publishable results

All licences are floating type of licence and can be moved from one PC to another.

Standard Edition (SE) on single workstation can use any number of cores to be run on this machine.

Network Edition (NE) of single workstation licence allows you to submit jobs across the network, but user will still have to share the work space.

Parallel Edition (PE) includes feature enabling scatchi part of the R-matrix code to be run in parallel, which gives a significant speed up for large molecules calculations. Also this edition includes command line interface. If you wish to use photoionisation module, you will need parallel edition.

Single workstation licence - to be used on a single workstation but can be used by multiple users.

Research group licence - includes up to 5 workstations used by researchers in one group, can be installed on the cluster but number of users should be limited only to 5 and within one group.

Institution licence - covers unlimited number of users across different groups within an institution.

Site licence - covers unlimited number of users within the company.

HPEM database - an extensive electron impact cross-sections database is included.

Min spec:

OS: Linux x86, **64 bit only**, 4 GB RAM (large calculations will require more RAM), 10 GB free disk space

Annual support includes initial training, e-mail and telephone support, bug fixes through the year.

Add on modules should be purchased separately and we can advise which ones you might need.

Additional plasma chemistries supplied with HPEM free of charge:

Ar,	O ₂ ,	NF ₂ ,
Cl ₂ ,	N ₂ ,	Ar/Al,
Ar/Cu,	Ar/Hg,	Ar/C ₄ F ₈ /O ₂ /CO,
He/N ₂ ,	C ₂ F ₆	

Price list 11/01/2018

Other chemistries can be designed and provided on request. Contact us on sales@quantemol.com

Price for additional HPEM modules

Use Case	Type of Licence	Licence term*	
		1 year	3 years
Non-commercial research	Single Workstation	¥ 68,200	¥ 68,200
	Research group	¥ 85,250	¥ 85,250
	Institution	¥ 102,300	¥ 102,300
Commercial research	Single Workstation	¥ 511,500	¥ 511,500
	Site	¥ 1,023,000	¥ 1,023,000
Proprietary chemistry data space in HPEM (NEW)	Any above	30% extra to the licence price	

Price for additional Quantemol-N modules

Additional modules, one-off price*	
Photoionisation	¥ 310,000
Q-N express	¥ 155,000
