

# The Chemistry Generator

## ChemGen 1.0 - Beta Version

### Trying to build a chemistry set from scratch?

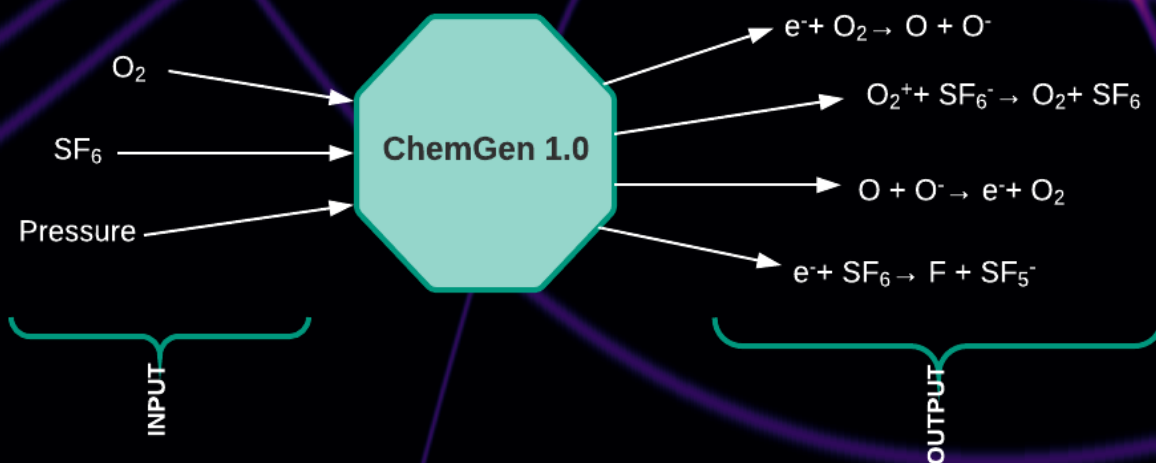

ChemGen will give you a complete chemistry set using the information from your input conditions and a gas mixture of interest.

Cross section and parameter data for the generated reaction sets will be provided in a zip file, and QDB customer support is available to discuss your results.

Create an account today!

### Key Features:

- Suggest species of interest based on feed gas of choice
- Generate self-consistent reaction chemistry sets for chosen feed gas
- Provide collated cross section or parameter data for the generated reaction set in a zip file
- Support provided for QDB members to discuss ChemGen results
