## General terms

**Commercial research** - research by commercial organisation or for commercial organisation with results not disclosed to public access.

**Non-commercial research** - research by not-for-profit organisation producing publishable results.

All licences are floating type of licence and can be moved from on PC to another.

**Standard Edition (SE)** on single workstation can use any number of cores to be run of this machine.

**Network Edition (NE)** of single workstation licence allows you to submit jobs across the network, but user will still have to share the work space.

**Parallel Edition (PE)** includes feature enabling scatchi part of the R-matrix code to be run in parallel, which gives a significant speed up for large molecules calculations. Also this edition includes command line interface. If you wish to use photoionisation module, you will need parallel edition.

**Single workstation licence** - to be used on a single workstation but can be used by multiple users.

**Research group licence** - includes up to 5 workstations used by researchers in one group, can be installed on the cluster but number of users should be limited only to 5 and within one group.

**Institution licence** - covers unlimited number of users across different groups within an institution.

**Site licence** - covers unlimited number of users within the company.

**Gift licence (New)** - QDB membership which can be granted to a customer's associate, but not used within the same team

**HPEM database** - an extensive electron impact cross-sections database is included.

Min spec:

OS: Linux x86, **64 bit only**, 4 GB RAM (large calculations will require more RAM), 10 GB free disk space

**Annual support** includes initial training, e-mail and telephone support, bug fixes through the year.

**Add on modules** should to be purchased separately and we can advise which ones you might need.

**Additional plasma chemistries** supplied with HPEM free of charge:

Ar,	O <sub>2</sub> ,	NF <sub>2</sub> ,
Cl <sub>2</sub> ,	N <sub>2</sub> ,	Ar/Al,
Ar/Cu,	Ar/Hg,	Ar/C <sub>4</sub> F <sub>7</sub> O <sub>2</sub> /CO,
He/N <sub>2</sub> ,	C <sub>2</sub> F <sub>6</sub>	

Other chemistries can be designed and provided on request. Contact us on [sales@quantemol.com](mailto:sales@quantemol.com)

## Price for additional HPEM modules

Use Case	Type of Licence	Licence term*	
		1 year	3 years
Non-commercial research	Single Workstation	£240	£480
	Research group	£300	£600
	Institution	£360	£720
Commercial research	Single Workstation	£1,800	£3,600
	Site	£3,600	£7,200
Proprietary chemistry data space in HPEM (NEW)	Any above	30% extra to the licence price	

List of additional add on modules for HPEM		
1.	EMC	Electron Monte Carlo
2.	SKM	Surface Kinetics Module
3.	MAXWELL	Maxwell Equation Solver for CCPs
4.	PCMC	Plasma Chemistry Monte Carlo Simulation
5.	MICROWAVE	Finite Difference Time Domain Microwave Module (FDTD)
6.	CIRCUIT	RF circuit module.
7.	SPUTTER	Sputtering
8.	HV	Photon beam injection
9.	RADTRANS	Radiation Transport Module (MCRTM)
10.	IMCS	Ion Monte Carlo Simulation

Training courses (NEW)	Group size	Duration		
		1 day	2 days	3 days
Quantemol team offers bespoke training courses for individuals or research groups. The prices quoted are estimates based on generic materials and an online format. The cost will increase if you require a very specific material to be developed. An in person training format will incur an additional fee to cover our expert's travel costs.	1 to 1 tutorial	£400	£750	£1,000
	Small research group (up to 5 people)	£440	£825	£1,100
	Big research group (up to 15 people)	£480	£900	£1,200
